## Remote Learning Integration

### Pre-made Templates

- PowerPoint/ Keynote
- PDF
- Videos

### Zoom 5.0

Zoom is a web-based video conferencing tool that allows users to meet online. It can record sessions, collaborate on projects, and share or annotate on one another's screens, all with one easy-to-use platform. Free Zoom offers video conferencing for up to 100 participants, provided the meeting runs for no longer than 40 minutes, at which point attendees are ejected from the conference. The host can simply start another call after the free 40-minute session.

## Canvas Remote Teaching and Learning

Canvas is a Learning Management System (LMS) for onground and online courses alike. In an online course, students will receive their syllabus, readings, lectures, and assignments through Canvas, as well as use it to engage in discussions and group work with their peers.

Novitiate Dashboard: To be created via De La Salle Lipa LMS. Sample Dashboard is my Lasallian class at DLSL.

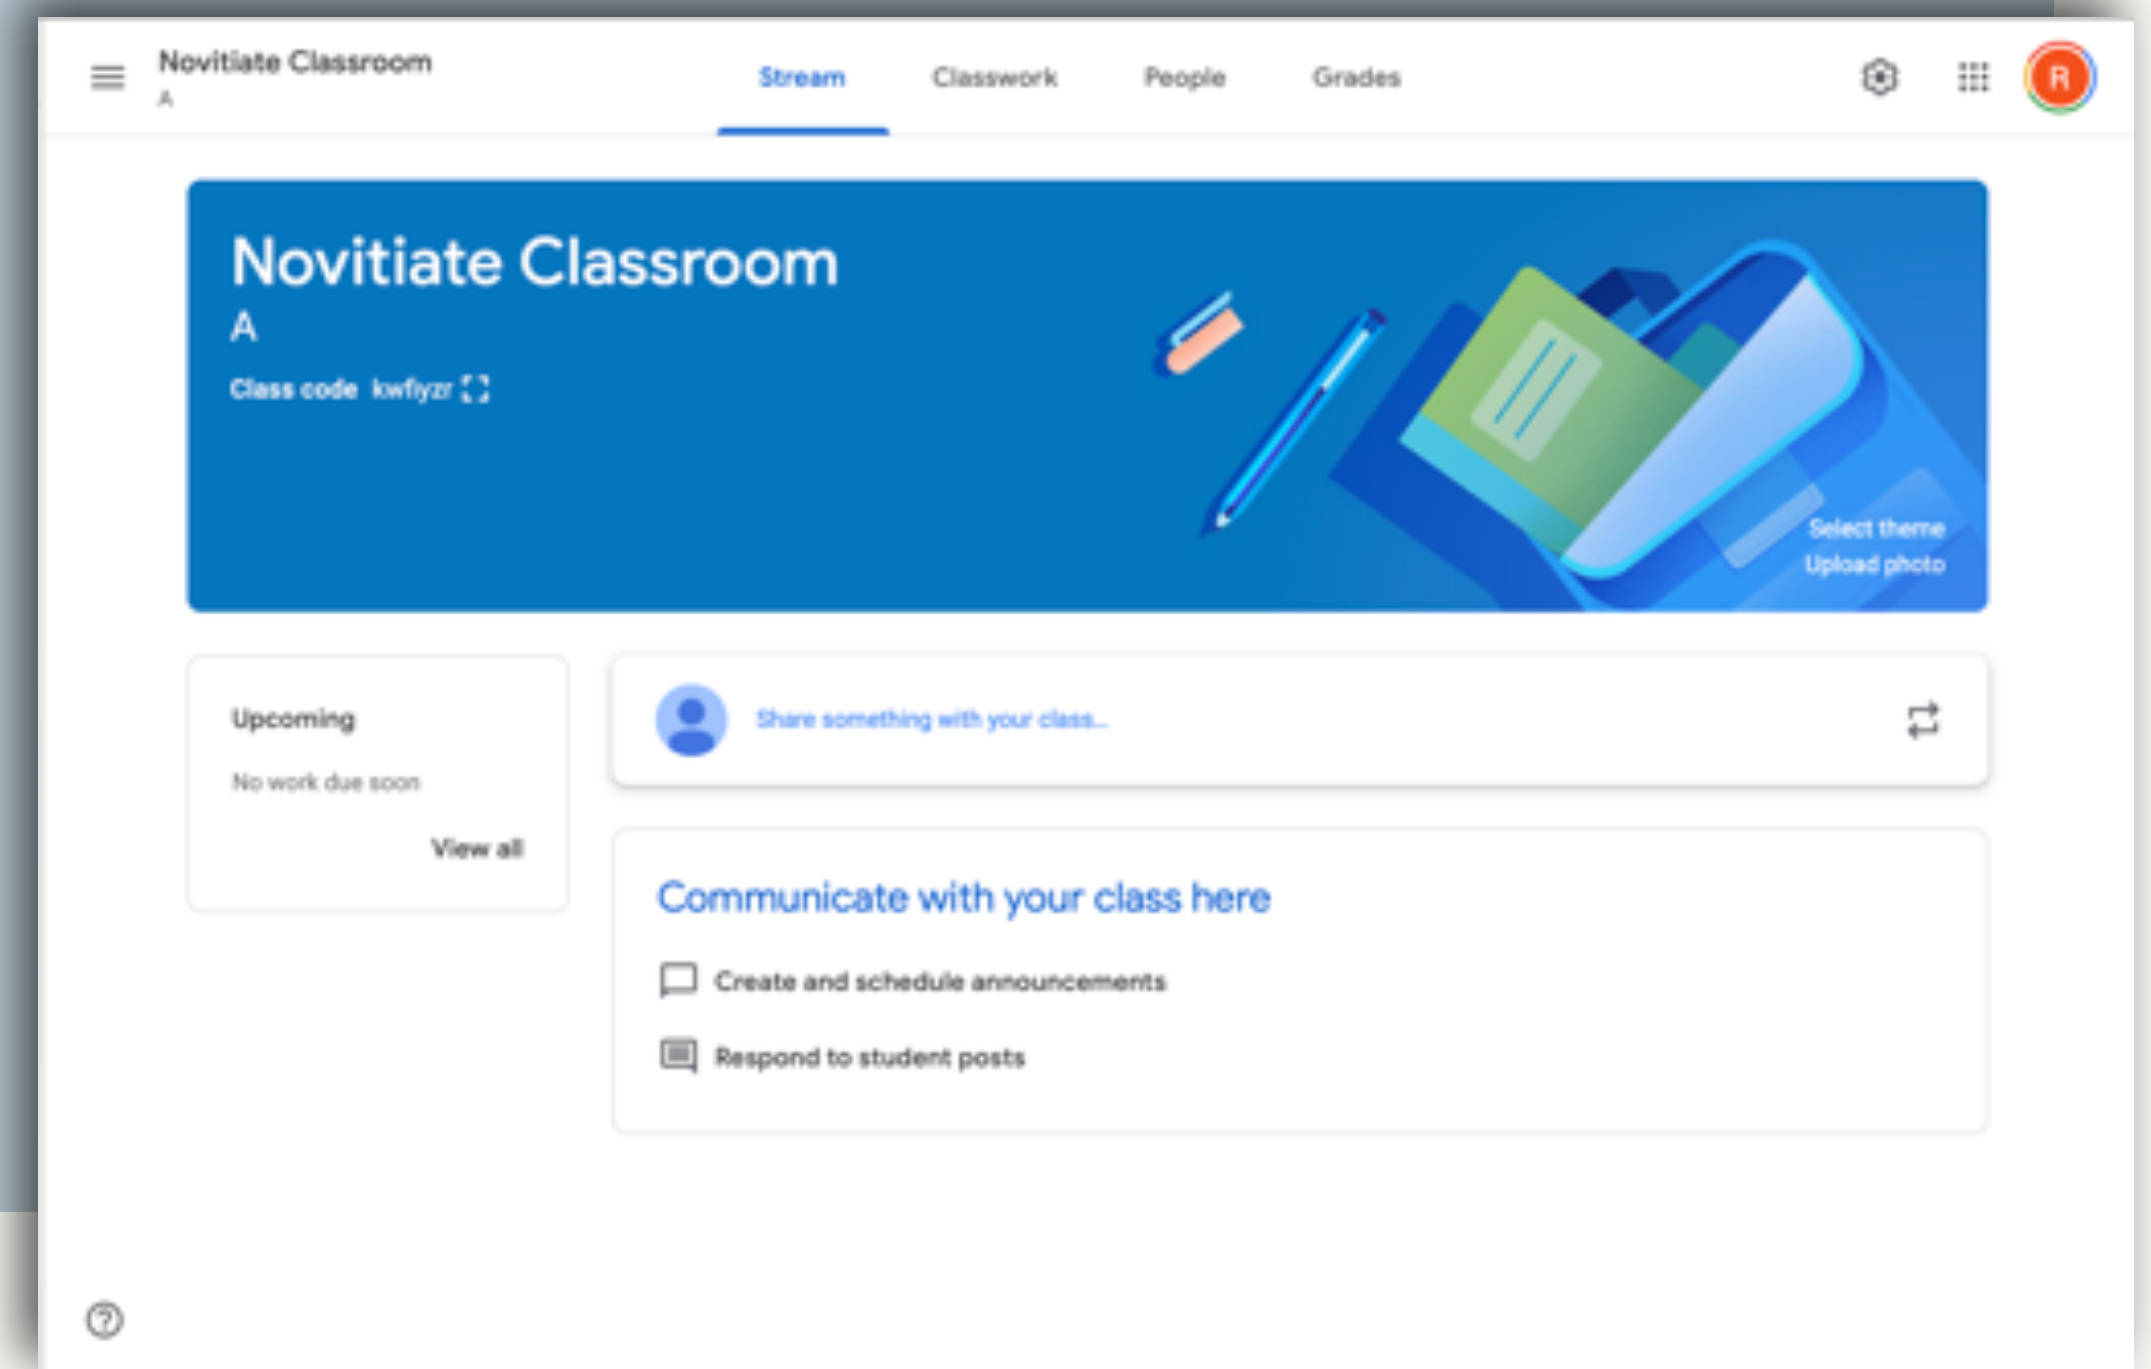

## Google Classroom Remote Learning

Google Classroom is a technology in the classroom app designed to provide a single dashboard to unify instructors' use of other Google apps. Its purpose is to facilitate paperless communication between teachers and students and streamline educational workflow. Classroom allows teachers to create classes, post assignments, organize folders, and view work in real-time.
